

INDIA FINTECH MARKET ANALYSIS

UPI Growth · Market Share · Transaction Composition
Ecosystem Scale · Funding Landscape · Digital Penetration · Global Expansion

UPI Transaction Growth (2016 - 2025)

From 0.09 million transactions at launch to 18.26 billion in March 2025 — ~200,000× in under 9 years

Monthly Transaction Volume — 2016 to 2025

Annual Volume Growth (2018-2024)

Avg Transaction Value — Democratisation Signal

UPI App Market Share (2021 - 2024)

PhonePe + Google Pay control ~85% of volume — an effective duopoly

Market Share by Transaction Volume

Share Trajectory — Where Is the Market Heading?

Transaction Composition — The P2P → P2M Structural Shift (2018 - 2024)

For the first time in 2024, merchant payments (P2M) crossed 50% of UPI transaction volume

UPI Ecosystem Scale (2017 - 2024)

Every Indian scheduled bank reachable, 390M merchant QR codes, 1.15 billion registered users

India Fintech Funding Landscape (2017 - 2024)

Post-ZIRP correction complete — 2024 shows recovery with smaller, more disciplined deals

Annual Fintech Funding

Deal Count vs Funding Value

2024 Funding by Sub-Sector

Digital Payments Penetration — India vs Global Benchmarks (2019 - 2024)

India's 21% CAGR dwarfs all peer markets — gap to USA has closed from 44 pp to 13 pp in five years

UPI Goes Global — International Expansion (2022 - 2025)

22+ countries now accept UPI; top remittance corridors carry \$120B+/year

UPI International Footprint

Top Remittance Corridors — UPI Coverage

UPI Monthly Volume (2022–2025)

P2P vs P2M Share (2018–2024)

Fintech Funding by Year (USD Bn)

01	UPI is the world's largest real-time payments rail At 18.26 Bn transactions/month (Mar 2025), UPI exceeds PayPal's annual volume circa 2020. It processes more transactions per month than Visa + Mastercard combined in many recent months.
02	The P2M crossover (51.9% in 2024) redefines the infrastructure requirement UPI is no longer a transfer tool — it is the primary merchant payments rail for 1.4 billion people. Merchant-grade challenges: settlement disputes, chargebacks, GST reconciliation, now at UPI scale.
03	Effective duopoly — but not permanent PhonePe + Google Pay = 85%. Paytm fell 11% → 6% in 3 years from regulatory & trust shocks. A third entrant (Amazon Pay, WhatsApp Pay, CRED) gaining real share within 3–5 years is plausible.
04	Merchant QR (390M) is the world's largest informal acceptance network Zero-MDR policy unlocked what decades of card POS terminal incentives could not. Any policy reversal on MDR would be an acute ecosystem disruption.
05	UPI's 22-country expansion targets \$120B+/year in diaspora remittances Major corridors (UAE, Singapore, UK) are live. Covering USA + Saudi Arabia would capture ~\$33B more at near-zero transfer cost vs incumbent 5–7% wire transfer fees.
06	Fintech funding normalised — discipline, not exit \$3.1B in 2024 with smaller avg deal size signals a market selecting for unit-economics-positive businesses. Survivors of 2022–2023 compression are stronger IPO/Series C candidates.
07	26 percentage points of penetration headroom remain Concentrated in rural, 60+ age, and feature-phone-only segments. Next leg requires: offline UPI (UPI Lite X), assisted digital (BC agents), vernacular UX.
